Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I - Claims 1-5 in the reply filed on 6/22/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

3. The disclosure is objected to because of the following informalities: On page 8, lines 15 and 27, "high" perhaps should be changed to -- higher --.

Appropriate correction is required.

4. Claims 1-5 are objected to because of the following informalities:
 - claim 1, line 7, "the former" should be -- a former --;
 - o line 9, "the rear" should be -- a rear --;
 - claim 2, line 2, "section" should be -- cross section --;
 - claim 3, line 4, "the tip" should be -- a tip --;
 - claim 4, line 5, "the former" should be -- respective former --;

- claim 5, line 2, "section" should be -- cross section --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102 / 35 USC § 103

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Masayoshi (JP 2000-88167) or in the alternative under 35 U.S.C. 103(a) as being unpatentable over Masayoshi (JP 2000-88167). Masayoshi shows all the claimed elements of a fuel rail conduit 1 including branch pipe 2, an inner collar 1-2a, an outer collar 2-3b, and a flat plane 2-2d around the outer collar. Note particularly the embodiments shown in Figs. 3a and 5b. Although not specifically shown by Masayoshi, it is inherent, or at least obvious to provide a plurality of branch pipes (although only one is shown) connected to the fuel rail conduit/assembly in order to service multiple fuel injectors. Likewise, it would have been inherent or at least obvious to one of ordinary skill in the art at the time the invention was made to have included a connecting member for receiving a tip of a fuel injector as such is well known in the art (although not specifically shown).\

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
